

RELAUTO: Automatic mass invoice reminders

*

 **Fix Me!** Migration in progress

Overview

This extension allows you to send invoice reminders automatically.

Configuration

Configuration is done via the Tools → Application settings → Extension settings menu.

The screenshot shows a window titled "Additional parameters" for the "Extension RELAUTO". The window is divided into two main sections: "Setting the reminder cycle" and "Setting up reminder emails".

Setting the reminder cycle:

- "Reminder every" is set to 7.
- A checkbox labeled "1" is next to "Send log file".
- "Invoicing manager" is set to "<not specified>".

Setting up reminder emails:

- "Sender" is set to "SOFAR ()".
- "To" is set to "Professional email address:".
- "Message" is set to "Rappel facture".
- "PJ" is an empty text field with a search icon.

At the bottom right, there are two buttons: "Confirm" with a checkmark and "Close" with an 'X'.

This screen allows you to set the reminder cycle (expressed in days). The reminder can generate a log file that will be sent to the billing manager if the 1 box is selected.

This screen also allows you to configure the sending of reminder emails: the sender, the standard message used, any attachments, the type of customer address, the sending of a confirmation of receipt, and the priority level.

Access: *Business* → *Mass invoice reminders*

This screen displays the list of invoices to be reminded, as well as the number of reminders sent and the date of the last reminder if the invoice is checked (i.e. if the reminder is activated for the invoice).

Clicking on the **Resend** button automatically updates the list of invoices to be resent.

Reminders are sent when Gestan is opened.
