

# Children

A1 proofreading not yet effective for this page. In the meantime, you can ask any questions on the [forum](#).

If you use Gestan in BtoC, for educational use (school, training center, etc.), or to manage your personal contacts, then you will be able to manage the parent-child relationship.

To do this, you must have activated the **Personal and Pro** option in the managed **Contact data types (Contact** tab of the general application settings).

## Using the screen

The screen allows you to manage additional data if necessary: a date, two labels, a drop-down list, and a Boolean. These fields are described via the additional fields management screen.

## Other “Contacts” articles
