QR-Invoice

Fix Me! A1 proofreading not yet effective for this page. In the meantime, you can ask any questions on the forum.

The QR-bill replaces the old pink payment slips in Switzerland. It's the Swiss equivalent of Factur-X, minus the totalitarian side.

Gestan can natively edit invoices in this format.

Prerequisites

You should obtain a QR-IBAN, see https://qr-facture.com/obtenir-qr-iban/. But Gestan also knows how to print a QR-Invoice with a normal IBAN.

How to recognize a QR-IBAN number?

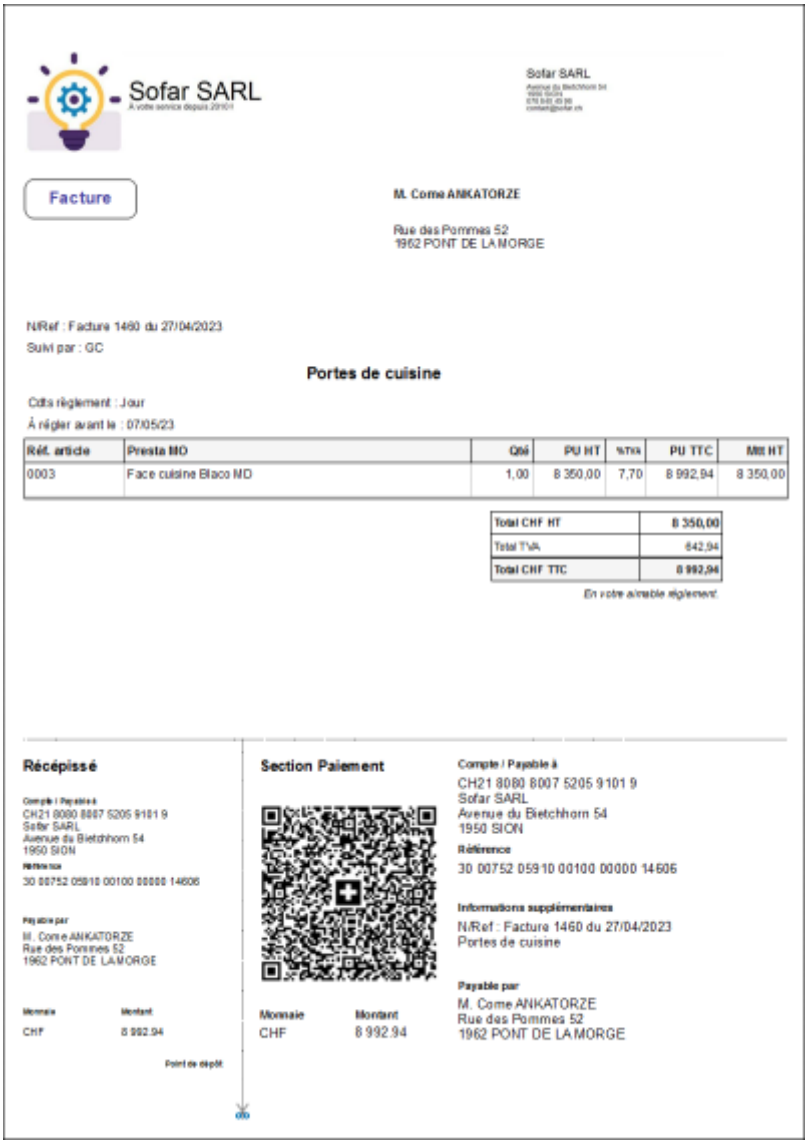

A QR-IBAN number can easily be recognized because the 3rd digit is always a 3.

For example:

- a QR-IBAN: CH44 3199 9123 0008 8901 2.
- a standard IBAN: CH37 0900 0000 3044 4222 5 does not contain 3 in the third digit and is therefore a normal IBAN.

To activate the printing of QR-Invoices, check the **QR-Swiss Code** box in the general settings of Gestan, tab Options per type, for invoices.

Invoice with Swiss QR-Code

Control over IBAN

If the creditor's IBAN is a QR-IBAN, this IBAN must contain 27 digits, including a 2-character check key.

If the creditor's IBAN is a “normal” IBAN, it must comply with the SCOR format: 25 characters starting with RF, 2 control digits, and the rest of the digits (for example, for 218080080075205910 19 → RF74218080080075205910 19)
