

Rentals / Loans (single lines)

 **Fix Me!** A1 proofreading not yet effective for this page. In the meantime, you can ask any questions on the [forum](#).

With Gestan you can register and invoice any equipment rental, whether bicycles, musical instruments, hotel rooms, boat or caravan pitches, etc.

Gestan is suitable for:

- single-line rentals: for example, you rent pianos, generally only one piano per rental
- [multiline rentals](#): for example, you rent sound equipment, always several pieces of equipment per rental.

List of rentals

Prerequisites: in the [general configuration, machine tab](#), declare machines-location.

Access: Activities → Rentals

It presents the list of rentals for the selected period.

The **Type** column displays the type of equipment (and not the type of rental).

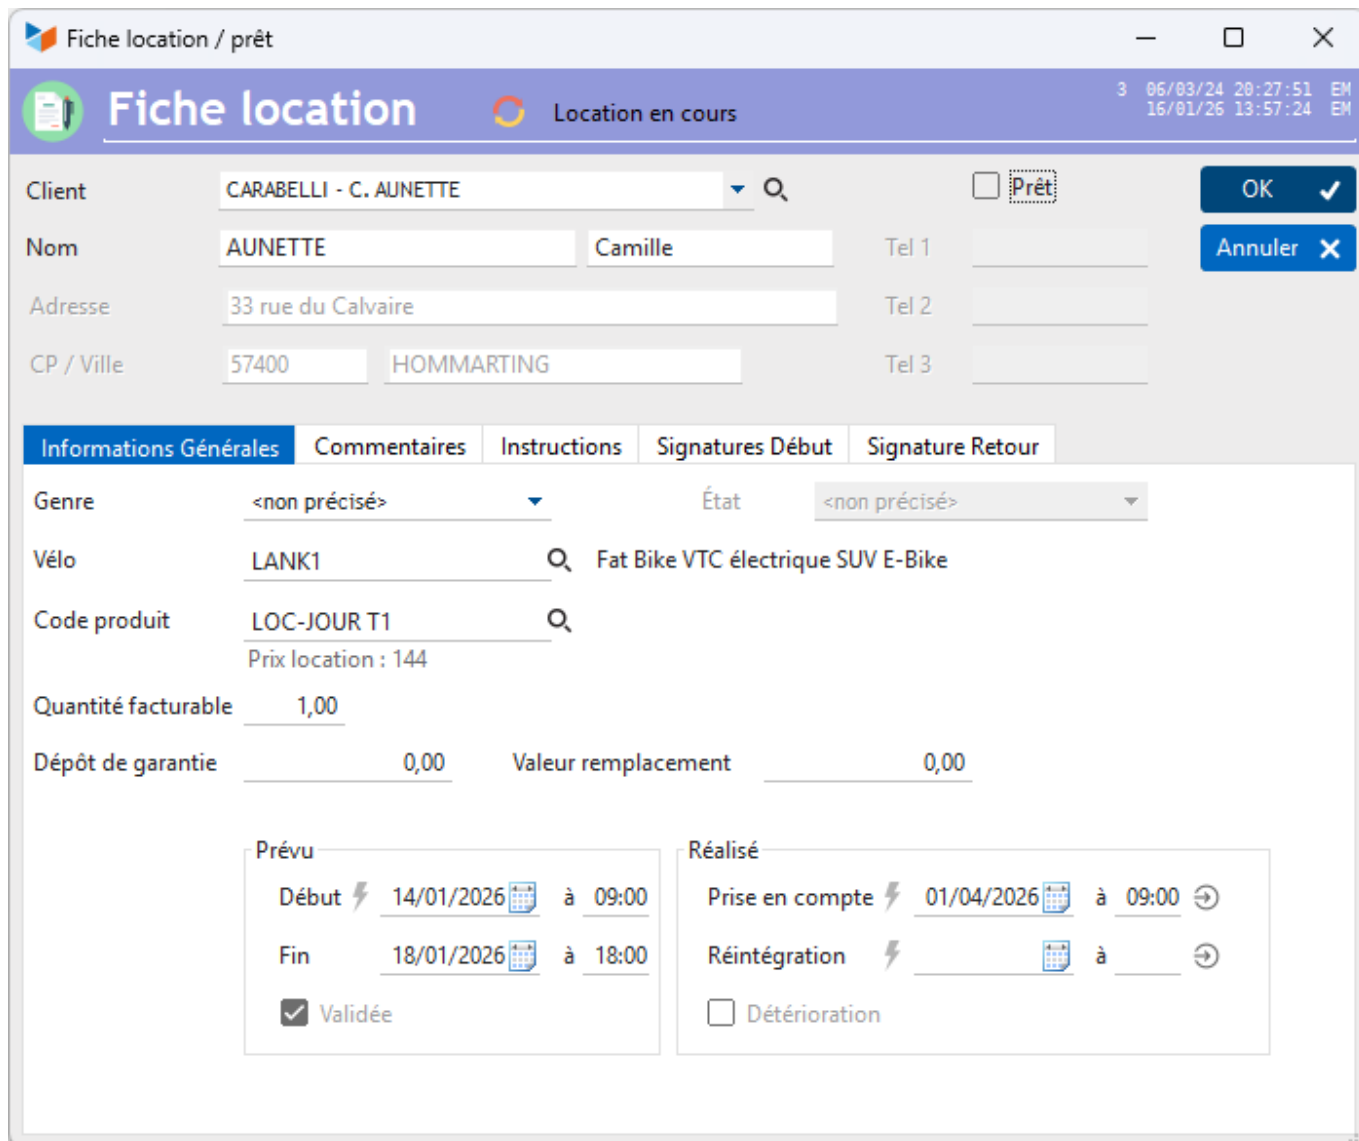

The **Gen Fact** button allows you to generate the invoice automatically for the selected rental. The method of calculating invoiced durations is [detailed here](#).

The contextual menu of the table allows you to position an **Anomaly** on any location.

It also allows you to edit a **Rental Document** (typically, a rental contract, but it can also be a user manual, connection codes, etc.).

The **Client** combo displays all contacts who have had a rental in the last 365 days, and allows you to quickly create a client.

The **Loan** checkbox indicates that this is a loan, not a rental.

You can indicate a **security deposit**, if applicable.

Then select the equipment being rented.

If you indicate a **product code**, Gestan will be able to automatically generate the corresponding invoice, depending on the price of the product, its sales unit if it is hour, day, half-day, or same day/man (See [calculation details](#)). The price that will be taken into account will be that indicated on the [machine rental] sheet (here, the VEL2 bike sheet), regardless of the product code.

Indicate a scheduled rental start and end date (+ one time if you manage rental hours, based on the general settings) in the **Scheduled** fields. If dates overlap, the software will indicate this to you before validating the form.

You can use the **Validated** box to indicate that you have validated the reservation.

In the **Completed** areas, you can indicate the actual rental start and end dates (with possible times).

The **Deterioration** box is intended to note the fact that a machine has been returned to you damaged.
