

Resetting files

A1 proofreading not yet effective for this page. In the meantime, you can ask any questions on the [forum](#).

It can be useful to completely reset certain files, especially for test purposes.

This screen allows you to delete and recreate files from scratch. This option is available to administrators only.

This program is for test purposes, and may cause logical inconsistencies in the database.

NEVER use this program on a production database, but ONLY on test databases.

Using the screen

Access: *Tools* → *Administration* → *Mass data processing* → *Other data* → *Reset files*

The screenshot shows a window titled "Operations on the database" with a blue header bar containing the text "Reset files". Below the header, a red warning box contains the text: "This program is NOT to be used on a production basis. It can ONLY be used on a test base." and "The reset is DEFINITIVE: the data of the concerned files are definitively destroyed." Below the warning box, the text "Reset the file:" is followed by a horizontal line. Underneath, the word "Reset" is positioned to the left of a dropdown menu that currently displays "Customer invoices". At the bottom right of the dialog, there are two buttons: "Validate" with a checkmark icon and "Close" with an 'X' icon.

Simply select the file to be **Reset** and click on the **Validate** button.
