SMS

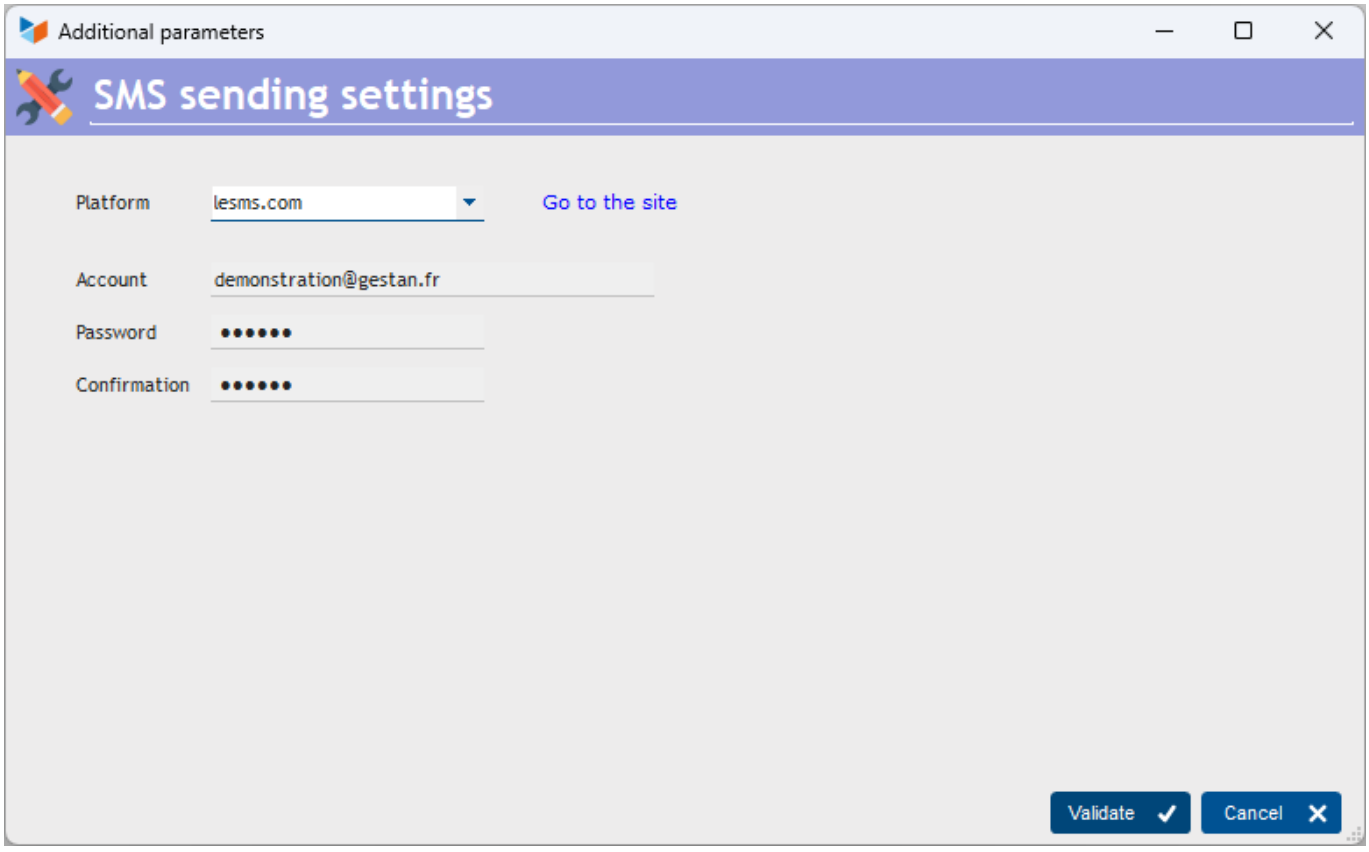

Fix Me! A1 proofreading not yet effective for this page. In the meantime, you can ask any questions on the forum.

You can send SMS messages directly from Gestan, either from an SMS service provider or via a smartphone account.

The SMS will be saved in the contact's folder (as an action).

Use

**Access : ** Tools → Application settings → SMS settings*

Sending via an SMS service provider

1. Open an account with an SMS service provider (currently, Gestan can use lesms.com, clickatell.com, reach-interactive.com and smseco.com - we can develop an interface with any other provider on request).
2. You will receive a code and password as soon as you open your account: enter this code and password in Gestan's settings options in the Tools menu.
3. Right-click on the contact list to send an SMS to the selected contact.

Send via smartphone

By selecting the <Package> option in the **Platform** combo, you can use the SMS package of your smartphone connected either to the Internet (C/S or Cloud mode) or to the same network (C/S mode).

This option requires the envoi SMS extension.
