

Consumption: simplified entry

A1 proofreading not yet effective for this page. In the meantime, you can ask any questions on the [forum](#).

Gestan comes with the easyConso program, which allows you to enter hourly consumption in a simplified way.

This program is intended to be installed on the computers of employees who do not have to know the company's internal information, but who must complete a time sheet every day.

The screenshot shows the Gestan application window titled "Temps de travail Eléonore MAROLEX" with the date "30/11/2023". The interface has two tabs: "Aujourd'hui" (selected) and "Historique". Below the tabs is a table with columns: "Projet", "Tâche", "Heures", and "Notes". The first row shows "DESALOUETTES" for the project, "Nettoyage" for the task, "02:30" for hours, and "Traitement en cours" for notes. At the bottom, there are buttons for "Comme hier", "Ajouter", and "Supprimer", along with a green text display "Total journée : 02:30" and a "Fermer" button. A user profile picture is visible on the right side of the interface.

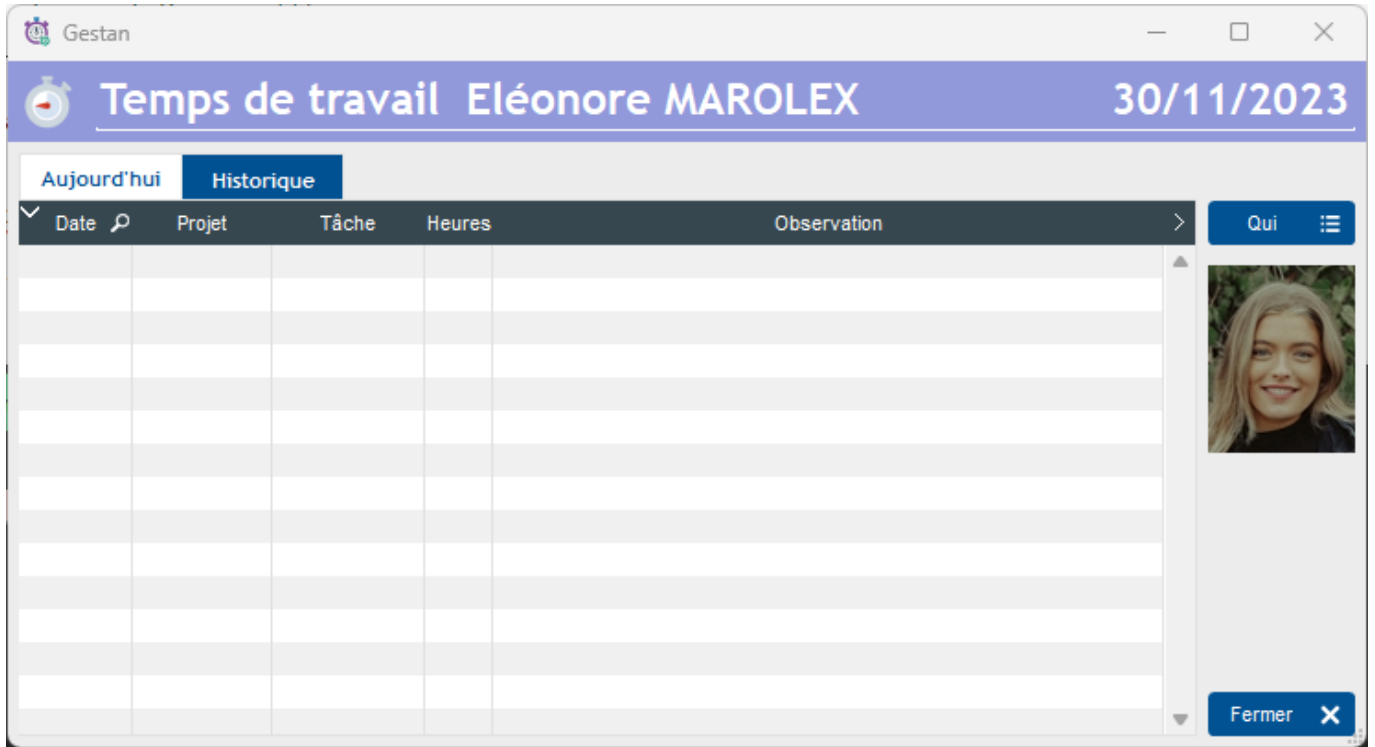

Projet	Tâche	Heures	Notes
DESALOUETTES	Nettoyage	02:30	Traitement en cours

The **Today** tab displays today's consumption.

A click on the **Like yesterday** button populates the current consumption table with those of the day before.

The **Validate** button allows you to validate the recordings for the current day

The **Who** button allows you to select another user, if the rights of the connected user allow it.

The **History** tab displays the consumption recorded for the user.

The date is colored orange for today's drinks, gray for those from the day before.
