When managing your product stock, you can:

- manage a single stock of products
- manage multiple stocks in different locations.

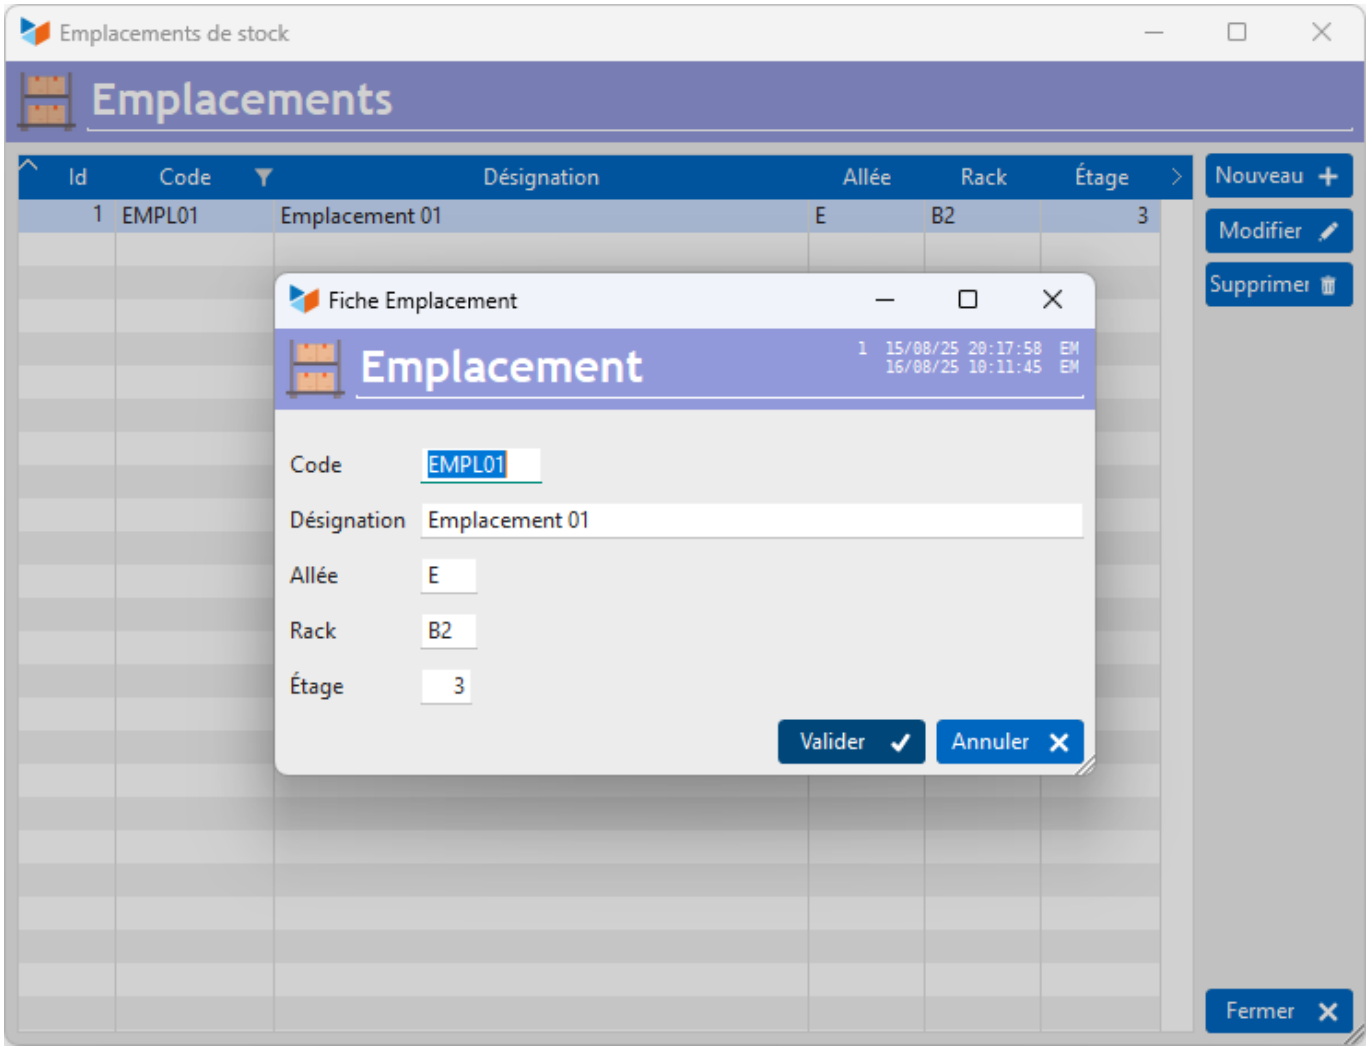

Stock locations can represent either a set of warehouses in different locations, the internal organisation of your main stock (e.g. racks or bins), or a combination of both.

Enabling the feature

Tick the box=== ===**Manage stock locations** in the general settings.

List of stock locations

Access: *Products→Stock Locations*

For each location, specify a **code** and a **description**.

In addition, you can specify an aisle number, a rack code and the shelf level within the rack.
