

Reports and Queries

 **Fix Me!** A1 proofreading not yet effective for this page. In the meantime, you can ask any questions on the [forum](#). “États et Requêtes” is developed by PCSoft, the publisher of Windev, the software engineering workshop used to develop Gestan.

With “Reports and Queries”, you can :

- create your own reports: forms, barcodes, PDFs, labels...
- modify supplied reports: change a logo, add a field or barcode, change a position or font...
- create their own database queries
- modify supplied queries

The “Reports and Queries” documentation is available on the [PCSoft website](#), where you can download the software.

All Gestan reports can be modified under “Reports and Queries”.

Modifying the invoice report requires a good level of Windev programming.

A good level of computer literacy is required to use this software.

Gestan does not provide any support for États et Requêtes!
